

BIO-ORGANIC CATALYST
THE POWER IN NATURE®

FACILITIES MANAGEMENT

Environmental Solutions

Eco-Cat Clean™

Advanced Bio-Catalytic Deep Cleaning & Odor Control Of Soils, Fats, Oils, Greases & Hydrocarbons

- ✓ Enhances breakdown of biological film growth, removing the residues that support septic and odorous gas formation.
- ✓ Keeps drain lines clean and free flowing through the breakdown of biological film growth and FOGs.
- ✓ Provides instant odor neutralization on contact.
- ✓ Improves sanitation protocols with cleaner surfaces.
- ✓ Dissolves mineralization in tanks and lines.

Deep Cleaning

Eco-Cat Clean™ is a revolutionary technological breakthrough in the treatment of organic wastes, including fats, oils and greases (FOGs), petroleum hydrocarbons, noxious odors and septic water conditions. Eco-Cat Clean™ consists of a highly concentrated composition of micro-nutrients and surface modifying compounds, with enhanced gas transfer characteristics, allowing the deepest cleaning of substrates and surfaces of any cleaner.

Odor Control

Eco-Cat Clean™ use transforms any environment, home or commercial facility, to the most amazingly clean and odor-free state, far surpassing any other cleaning solution available on the market. Odors are instantly neutralized, upon contact, and the organic surface accumulations and residues that cause odors are removed for long-term odor control and optimal healthy conditions.

The Eco-Cat Clean™ product is available in four different sizes: 128 oz. (1 gallon), 256 oz. (2.5 gallons), 5 gallons, and 55 gallons.

Drain cleaned with a bacterial/enzyme product

Drain cleaned with Eco-Cat Clean™

Bio-Organic Catalyst solubilizes the cellular structure of organic waste, thereby increasing gas transfer rates, and making it easier for naturally occurring bacteria to digest organic substances and oxidizing agents to work.

Pool-Cat™

Crystal Clear Water Clarity in Pools and Spas

- ✓ Ultra-Pure Water Clarity.
- ✓ Dissolves Body and Suntan Oils.
- ✓ Neutralizes Chlorine Gas Fumes (VOCs).
- ✓ Reduces Chemical Usage.
- ✓ Helps Prevent Scaling.
- ✓ Keeps Filters Clean.

Pool-Cat™ is a breakthrough new green chemistry that leads to a new model in water care. It works by increasing dissolved oxygen levels and rapidly catalyzing organic contaminants, resulting in absolutely crystal clear water. This extraordinary capability makes it possible to substantially reduce the use of harsh chemicals and providing the highest level of water safety.

The vital factor in creating clean, clear and ultimately, healthy bodies of water is in the complete elimination of the soluble organic contaminants within water, which virtually eliminates backwashing requirements. Pool-Cat™ triggers the rapid catalytic breakdown of organic contaminants to create clean and clear bodies of water. Pool-Cat™ breaks down and dissolves body oils, suntan oils/lotions, hair treatments and cosmetics in the water.

Pool-Cat™ is applied directly into the water or added to the filter system. It will immediately break down any organic elements in the water column, prevent mineralization scaling. It will also substantially decrease the need for all other chemicals, including: scale removers, clarifiers, filter cleaners or acid washing.

The Pool-Cat™ product is available for both spa and pool use: Spa 8 oz., Pool 32 oz., Pool 126 oz. (1 gallon), Pool 236 oz. (2.5 gallons).

BOC bio-catalytic compositions, Eco-Cat Clean™ and Pool-Cat™ offer the highest level of performance in deep cleaning and odor control, combined with a safety profile that is unequalled in the industry. The array of benefits made possible with BOCs can be applied to all of the major environmental challenges encountered by the facilities manager.

Odors from grease interceptors and organic waste containers can be cost-effectively controlled with simple equipment set-ups. Pools and spas will be naturally kept cleaner and clearer, while reducing the fumes of traditional pool chemicals, all while substantially reducing fouling and mineralization build-up. The ultra-deep cleaning of the full spectrum of organic pollutants, including deeply embedded greases and oils, and hydrocarbons, enables the facilities manager to bring back deeply stained surfaces to their original cleanliness.

Eco-Cat Clean™ can be added to kitchen and bar cleaning routines, parking garages and driveways, providing a solution to the deeply embedded stains, lingering odors, slippery floors, and drain cleaning, that no other cleaning product line has ever been able to solve.

Benefits Include:

- Ultra-Deep cleaning of kitchens, floors, bars, garages.
- Instantaneous odor neutralization.
- Eliminate hazardous chemicals and discharges.
- Dissolve clogging and other scum-like residues.
- Reduce maintenance time and equipment failure.
- Highest safety and environmental compliance standards.

Seal of Safety™

The Bio-Organic Seal of Safety™ is our trademark declaration of our commitment to offering green biocatalytic solutions that shift the treatment of our water resources to a more sustainable ecological model.
