

CT 100™ enhances water clarity, mitigates fouling of surfaces and filters, and allows reductions in chemical agents.

CT 100™ creates highly reactive nanobubbles that increase oxygen transfer within water. These nanobubbles act to dissolve both biological and inorganic fouling.

CT 100™ offers synergies with existing sanitizing chemicals and filtration systems.

- Reduces energy loss.
- Improves water discharges.
- Reduces sanitizing chemistries.
- Maintains cleaner surfaces.
- Eliminates fouling of filters.

SEAL OF SAFETY

The Bio-Organic Seal of Safety™ is our commitment to offering innovative biocatalytic solutions in water treatment.
